CASCADE COPPER SIGNS DRILL CONTRACT FOR PHASE 2 PROGRAM AT THE CENTREFIRE COPPER-GOLD PROJECT NEAR DRYDEN, NW ONTARIO

For Immediate Release

- **Minimum 600m of NQ-size core is planned, with the ability to expand the program**
- **Follow up on results from Hole CF-26-04: 1.56% CuEq* over 14.75m within 0.42% CuEq* over 122.4m and from CF-26-05: 1.27% CuEq* over 10.50m within 0.46% CuEq* over 69.0m**
- **Mobilization projected for the week of November 23, 2026**

Vancouver, British Columbia – November 19, 2026. **Cascade Copper Corp.** (CSE: "CASC"/FRA: 91O) **("Cascade" or the "Company")** is pleased to announce that it has signed a drilling contract for a Phase 2 minimum 600-metre diamond drilling program at its Centrefire Copper-Gold Project, located approximately 40 kilometres northeast of Dryden, Ontario. The Company expects the drill contractor to mobilize during the week of November 23, 2026, with drilling focused on priority copper-gold-silver targets that were identified at the Main Gossan Zone (MGZ) during the Company's maiden drill program completed earlier this year. The Company's Press Release on October 15, 2026, discusses the high-grade results from that program.

"We've been keen to get back at Centrefire considering the encouraging results we received from our maiden drill program this summer," stated Jeffrey Ackert, President and CEO of Cascade Copper. *"This Phase 2 drill program will endeavour to expand the mineralization at the MGZ, along strike and at depth. It should also give us a better idea of the geological model to best plan future programs."*

Table 1*: Highlights of Results from the Maiden Drill program at the Centrefire Copper-Gold Project*

Hole ID	Comment	From (m)	To (m)	Copper (%)	Gold (g/t)	Silver (g/t)	CuEq* (%)	Length (m)

CF-26-05	*and*	48.00	67.10	0.24	0.179	1.157	0.42	19.10

**CuEq values are calculated using the following commodity prices and recovery factors: $5.00/lb Cu, $3750/oz Au, $50/oz Ag and 85% recovery for Cu, 75% recovery for Au and 65% recovery for Ag (values from similar sulphide rich deposits). Using those values the CuEq% = Cu% + Au g/t x 0.965074 + Ag g/t x 0.01115*

Cascade Copper expects to provide additional updates as mobilization commences and drilling progresses.

The technical information in this news release was prepared and approved by Shannon Baird, P.Geo., a Qualified Person as defined in National Instrument 43-101. Mr. Baird is Vice President Exploration of Cascade Copper Corp. and registered as a Professional Geoscientist with the Professional Geoscientists of Ontario as well as the Engineers and Geoscientists of British Columbia.

About Cascade Copper

Cascade Copper is an exploration stage natural resource company engaged in the evaluation, acquisition, and exploration of copper based mineral resource properties. Cascade is focused on copper and gold, porphyry and mesothermal gold deposits in British Columbia and VMS and BIF copper, gold, and silver style deposits in Ontario. Cascade's priority is to conduct exploration using modern technology that includes 3D inversion modelling of geophysics, LiDAR elevation models, and AI enhanced Predictive Modelling from all historic and modern data inputs. Cascade has five projects, including the Copper Plateau Copper-Moly Project, the Centrefire Copper-Gold Project, the Rogers Creek Copper-Gold Project, the Fire Mountain Copper-Gold Project, and the Bendor Gold-Tungsten Project.

DISCLAIMER & FORWARD-LOOKING STATEMENTS

This news release includes certain "forward-looking statements" which are not comprised of historical facts. Forward-looking statements are based on assumptions and address future events and conditions, and by their very nature involve inherent risks and uncertainties. Although these statements are based on currently available information, Cascade Copper Corp. provides no assurance that actual results will meet management's expectations. Factors which cause results to differ materially are set out in the Company's documents filed on SEDAR+. Undue reliance should not be placed on "forward-looking statements." Forward-looking statements in this news release include, but are not limited to, statements regarding the timing of mobilization and the start of drilling, the size and scope of the Phase 2 drill program, the potential to expand the program, and the Company's future exploration plans at the Centrefire Project.
